

# Refund/Void ePayments - An Overview

Last Modified on 12/09/2020 10:02 am EST

Permissions control the ability for your Users to see certain data and take specific actions. Before moving forward review [User Permissions Required to Refund or Void an ePayment](#).

You are able to process **credit card** voids and refunds from within Jackrabbit!

When you are set up for ePayments in Jackrabbit, click the **R** on the payment line of a credit card payment to:

- Send the refund/void transaction to the gateway for settlement to the credit card.
- Record the void/refund in the family's account with the transaction ID from the merchant processor added to a link in the ePmt column.

Bank draft/ACH payments cannot be voided or refunded from within Jackrabbit. Contact your ePayment provider, or log into your virtual terminal, to void the payment or issue a refund. Use the **R** to record that transaction on the family's account.

## UK Voids & Refunds

At this time, customers in the United Kingdom cannot process a refund directly through Jackrabbit. You will see an alert after clicking the **R** on an ePayment. Use your virtual terminal to process the void/refund and then click the **R** to record the refund transaction in Jackrabbit.
