

Get Started with ePayments using the ePayments Wizard

Last Modified on 11/03/2020 12:29 am EST

Jackrabbit offers an **ePayments Wizard** to guide you through the process of getting set up to accept credit cards and/or bank account drafts from within your database!

The wizard, located in the *Tools* menu, will walk you through the following steps:

- **Select an ePayment Partner**
Choose an ePayment Partner. Jackrabbit has partnered with two payment providers to offer you a choice for your integrated online payments solution.
- **Manage User ID Permissions for ePayments**
Decide which of your Jackrabbit database Users will have ePayment permissions.
- **Manage Credit Card & Bank Account Settings**
Define which credit cards you will accept and configure settings for Web Registration (new customers) and Parent Portal (existing customers).
- **Manage Email Notification Settings**
Determine your desired settings for receipts emailed to your customers.

Depending on where you are in your ePayments setup you will see either **ePayments Wizard** or **ePayments Settings** in your *Tools* menu.
