## Manage the Time Clock Step 4 - Export to QuickBooks (Desktop Version Only)

Last Modified on 11/03/2020 12:30 am EST

Jackrabbit's time clock integration is available only with QuickBooks Desktop; time cannot be exported to QuickBooks Online.

To fully utilize this option you must have **QuickBooks Payroll**. Jackrabbit can create an <u>IIF file</u> containing staff hours to be imported into QuickBooks Desktop for payroll processing. There are several items which must be set up correctly.

Before exporting to QuickBooks for the first time be sure you've followed all the **Time Clock Export Settings** instructions.

|                                                                | Export to Pa                  | iyroll                 |
|----------------------------------------------------------------|-------------------------------|------------------------|
| < Return                                                       |                               | ? Help                 |
| Search Criteria <b>?</b>                                       |                               |                        |
| A Pay Date's information can be export<br>Location<br>Pay Date |                               | s payroli system.      |
| Export Express Payroll File                                    | Email File to Express Payroll | Export QuickBooks File |

- The import will work correctly only if JackrabbitDepartment names are exactly the same as QuickBooks Payroll Item names.
- If you want to import QuickBooks "Class" information, JackrabbitDepartment names must match the QuickBooks Class names.
- If you want to import both staff hours and "class", then: JackrabbitDepartment names = QuickBooks Payroll Item names = QuickBooks Class names.

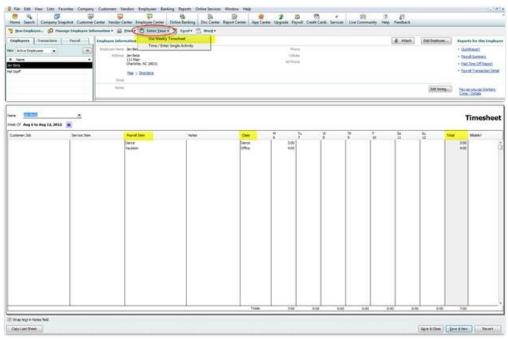

After set up is complete, we recommend importing test data before importing the first full pay period. For example, try importing 2 employees hours into QuickBooks to verify they were set up correctly (duplicate employees weren't created in

QuickBooks) and to check the payroll module for accuracy (correct # of hours, etc). Any

information entered into Jackrabbit or QuickBooks for the test, can be deleted after you're finished.

- 1. Point to **Staff Portal** in the menu bar, select**Time Clock** and **Export to Payroll**.
- 2. Select a Location and Pay Date.
- 3. Select Export QuickBooks File.
- 4. In the Opening payrollexport.iif pop-up box, select the option to **Save** the file and save it to your computer.
- 5. Import the file into QuickBooks (QuickBooks > Import > IIF Files > Select the saved IIF file).
- 6. After the import is complete verify hours are in each employee's **Weekly Time Sheet** in your QuickBooks database.

7. Process payroll in QuickBooks.

The QuickBooks Reports below include 2 employee's times that have been imported into QuickBooks and processed for testing purposes.

## QuickBooks Payroll Summary Report
