

# Convert Traditional Table Codes to Mobile Friendly Table Codes

Last Modified on 11/03/2020 12:30 am EST

From Jackrabbit inception until late 2015, the class listings html codes provided were "traditional" codes which displayed with table borders. These codes were not mobile-friendly (meaning they didn't display well on mobile devices).

In 2015 Jackrabbit developed new responsive codes that automatically transform to vertical display when viewed on small devices (website must be optimized for mobile viewing).

The codes given in this Help Center are the responsive codes. This means that if you are using these codes, and your site is mobile optimized, then the tables will work correctly on cell phones, ipads, etc.

optimized.

*Not sure if your website is optimized to be mobile friendly? Contact your webmaster. Your website may require site modifications and CSS changes to work optimally with the responsive tables. Jackrabbit can not advise how, nor update your website to be, mobile-*

---

## What is the difference in appearance between the traditional code and the new responsive code?

When viewed on a large screen, the difference is simply the borders and shading. However, the traditional tables do not work well when viewed on smaller screens.

The responsive codes produce a table that **automatically** adjusts to a mobile-friendly view when viewed on a mobile-friendly web page.

[Example - tables viewed on large screen](#)

Register	Class	Days	Times	Gender	Ages	Session	Tuition
<a href="#">Register</a>	Bunny Bounce Intro	Mon	2:00pm-3:00pm	Both	1 - 3	Fall 2019	25.00
<a href="#">Register</a>	Bunny Bounce	Wed	4:00pm-5:00pm	Both	3 - 5	Fall 2019	25.00
<a href="#">Register</a>	Bunny Bounce	Tue	5:00pm-6:00pm	Both	3 - 5	Fall 2019	25.00
<a href="#">Register</a>	Bunny Bounce Extreme	Thu	4:00pm-5:00pm	Both	6 - 11	Fall 2019	30.00
<a href="#">Register</a>	Bunny Bounce Extreme	Fri	5:00pm-6:00pm	Both	6 - 11	Fall 2019	30.00
<a href="#">Register</a>	Bunny Bounce Intro	Mon	3:00pm-4:00pm	Female	1 - 3	Fall 2019	25.00
<a href="#">Register</a>	Bunny Bounce Intro	Mon	4:00pm-5:00pm	Male	1 - 3	Fall 2019	25.00

Traditional table - cells have borders

Register	Class	Days	Times	Gender	Ages	Session	Tuition
<a href="#">Register</a>	Bunny Bounce Intro	Mon	2:00pm-3:00pm	Both	1 - 3	Fall 2019	25.00
<a href="#">Register</a>	Bunny Bounce	Tue	5:00pm-6:00pm	Both	3 - 5	Fall 2019	25.00
<a href="#">Register</a>	Bunny Bounce	Wed	4:00pm-5:00pm	Both	3 - 5	Fall 2019	25.00
<a href="#">Register</a>	Bunny Bounce Extreme	Thu	4:00pm-5:00pm	Both	6 - 11	Fall 2019	30.00
<a href="#">Register</a>	Bunny Bounce Extreme	Fri	5:00pm-6:00pm	Both	6 - 11	Fall 2019	30.00
<a href="#">Register</a>	Bunny Bounce Intro	Mon	3:00pm-4:00pm	Female	1 - 3	Fall 2019	25.00
<a href="#">Register</a>	Bunny Bounce Intro	Mon	4:00pm-5:00pm	Male	1 - 3	Fall 2019	25.00

Responsive table - no borders, rows alternate shading

## Example - tables viewed on small screen

Register	Class	Days	Times	Gender	Ages	Session	Tuition
<a href="#">Register</a>	Bunny Bounce Intro	Mon	2:00pm-3:00pm	Both	1 - 3	Fall 2019	25.00
<a href="#">Register</a>	Bunny Bounce	Wed	4:00pm-5:00pm	Both	3 - 5	Fall 2019	25.00
<a href="#">Register</a>	Bunny Bounce	Tue	5:00pm-6:00pm	Both	3 - 5	Fall 2019	25.00

Traditional table

<a href="#">Register</a>
<b>Bunny Bounce Intro</b>
Days Mon
Times 2:00pm-3:00pm
Gender Both
Ages 1 - 3
Session Fall 2019
Tuition 25.00
<a href="#">Register</a>
<b>Bunny Bounce</b>
Days Tue
Times 5:00pm-6:00pm
Gender Both
Ages 3 - 5
Session Fall 2019
Tuition 25.00
<a href="#">Register</a>
<b>Bunny Bounce</b>
Days Wed
Times 4:00pm-5:00pm
Gender Both
Ages 3 - 5
Session Fall 2019
Tuition 25.00

Responsive table - automatically converted to blocks

## How do I change my traditional table codes to the responsive table codes?

If you want to convert traditional Jackrabbit class listings tables on your web pages over to the responsive version, you will need to log into your website editor, and edit each code that is producing a table, i.e. if you have 8 separate tables, you will need to edit the code for each of those 8 tables.

The domain and the custom query strings remain the same, but the **path** is different. The path is the only part you will need to edit:

1. If you currently **script** the table into your own web page, make the following edits to each code:

```
https://app.jackrabbitclass.com/Openings.asp?id=XXXXXX&(yourcustomquerystring)
```

Replace the url path (highlighted above) with this new path (highlighted below).

```
https://app.jackrabbitclass.com/jr3.0/Openings/OpeningsJS?OrgID=XXXXXX&  
(yourcustomquerystring)
```

**Replace the XXXXXX with your specific Organization's ID number.** Find yours by going to Tools > Online Web Registration - it is shown in blue.

2. If you currently **link** to an external table, make the following edits to each code:

```
https://app.jackrabbitclass.com/OpeningsDirect.asp?id=XXXXXX&(yourcustomquerystring)
```

Replace the url path (highlighted above) with this new path (highlighted below).

```
https://app.jackrabbitclass.com/jr3.0/Openings/OpeningsDirect?OrgID=XXXXXX&  
(yourcustomquerystring)
```

**Replace the XXXXXX with your specific Organization's ID number.** Find yours by going to Tools > Online Web Registration - it is shown in blue.

## Is it possible to adjust the font size in the tables?

The font size is 9 pt in both the traditional tables and responsive tables; however, the responsive tables may not respond to your CSS rules dictating a different font size. If you need to dictate a different font size for the larger version of the responsive tables, your webmaster should use something like this in the CSS:

```
@media (min-width: 62em) {  
  
  .jr-container .responsive-table {  
  
    font-size: 12px;  
  
  }  
}
```

}

If you have problems converting your tables, contact the Integration Team at [onlineereg@jackrabbittech.com](mailto:onlineereg@jackrabbittech.com). Let us know the exact code you are using and the webpage where the table is located and we will be happy to help.
