

Restore a Lead File Family to your Main Database

Last Modified on 11/03/2020 12:31 am EST

Watch a (1:06) video tutorial on Contacting Leads and Restoring a Family

Use the **Restore Family** button in a family's Lead File record to move them from the Lead File back to your main Jackrabbit database.

Families must be restored to your main database individually. There is no option to mass restore Lead Files back to the main Jackrabbit database.
