

# Sell and Track Punch Cards in Jackrabbit

Last Modified on 11/03/2020 12:33 am EST

Punch cards are like a pass that is 'punched' each time a student takes a class. With the fee for all visits paid up-front, the number of prepaid classes depletes with each visit. This is a great way to offer discounted rates to students who don't regularly attend classes with you. Jackrabbit can help you sell and track these!

Punch Cards are typically sold in increments or groups of 10, 20 or 30. The price per class is lower than if a student were to drop into classes that many times.

*With punch cards, it is crucial that you track the usage and ensure that the card is not used beyond the number of classes it was issued for.*

## Set up Punch Cards in Jackrabbit

Jackrabbit's **Store** can be used to sell and track punch cards.

1. **Add a Category 1** value of 'Punch Card' to help with revenue reporting.
2. **Create generic store items** for each type of punch card you offer, e.g., 10 Class Punch Card.
3. Click **Save Changes**.
4. **Sell the store item** when a family purchases a punch card.

**Add Item**

**Item Info**

## Track Each Punch on the Punch Card

For every punch card sold to a family, create a unique store item.

Use the family name as the item barcode and name for quick lookup. This item is unique to the family and should not be used for any other sale.

To track how many punches have been used, set the item to track the quantity on hand. The unique item will not have a price since it is used for tracking usage. The generic item (e.g., 10 Class Punch Card) was used just to bill the family for the punch card.

When the student takes a class, sell the family the unique store item. This will reduce the quantity on hand.

The student doesn't need to be enrolled into the class. If the student is already in your database, their 'attendance' can be seen by looking at the transaction history on the **Family Record**.

## Reporting for Punch Cards

To check the remaining classes on a card, use the **List Store Items** report to see the quantity on hand.

# of punches used (classes taken)

An alternative to selling punch cards (pay for all visits front) is to sell drop-ins (pay as you go). Refer to [Using Jackrabbit to Sell Drop-ins](#) for more details.

## Virtual Punch Cards

If you are a Mobile Inventor App customer, you can use the app to sell and track virtual punch cards. Mobile Inventor is fully integrated with Jackrabbit and the fees are reflected real-time in the family's account when purchased. Refer to [Mobile Inventor](#) for more details or visit <https://mobileinventor.com/mobile-features/>.
