

Barcode Scanner Attendance Tracking - An Overview

Last Modified on 11/03/2020 12:35 am EST

Watch a (2:43) video tutorial on Using Barcode Scanners to Track Attendance

A database must be set to track attendance in order to utilize Jackrabbit's Barcode Scanner functionality.

Barcode readers allow students to scan a card with a barcode to record attendance date & time. This feature uses the *Student ID* field (on the [Student Summary](#) page) as the barcode number. Jackrabbit works well with most barcode readers. The reader must be able to simply return a number with the (Enter key) at the end - most scanners can do this. This simple scanners usually do not require driver software installation and simulate someone typing in the barcode number and hitting the (Enter key).
