

Archive Classes - An Overview

Last Modified on 11/03/2020 12:35 am EST

Watch a (1:46) video tutorial on Archiving Classes

Once a class has completely ended and all tuition has been posted, the class should be archived rather than deleted. Archiving a class sets the class status to Archived. *A class does not become inactive simply because the end date has passed.* It must be archived in order for Jackrabbit to recognize that the class is no longer active and that the enrollment is considered 'in the past.' *It is not necessary to Mass Drop students prior to archiving a class. Archiving the class will move the class from a student's Current Enrollment to Past Enrollment on the Student's Class tab.*

Archiving classes when a session is completed is important for several reasons:

- It updates the Class Status = Archived.
 - It archives any students on the class's Wait List. (If a class is later **restored**, the wait list restores as well.)
 - It updates every enrolled student (not already dropped) including future drops by setting the Drop Date to the current date and the Drop Reason to Class Archived. (Note: Students in archived classes do not appear as dropped students in Enrollment Reports since they are not 'true' drops'.)
 - It places the class into the Past Enrollment section of the Student Classes tab.
-
