

# Copy Multiple Classes at Once

Last Modified on 11/16/2020 12:27 pm EST

The **Copy Class Session** function (from the *Classes* menu > *Copy Classes* option) will assist you in setting up a new **session** by copying multiple classes from one session into another. After you have **created a drop-down value** for the new session, use Copy Class Session as the second step in **transitioning between sessions**.

**If any of the classes you want to copy have been archived, you will first need to restore them before they can be included in the Copy Class Session function.**

## Search Criteria (which classes do you want to copy?)

In the **Search Criteria** section, select the classes you want to copy into your new session. This criteria is located on the *Summary* tab of a *Class* record.

The *Session* drop-down is required, however, it is optional to copy classes from only a specific *Class Category 1*, *Category 2*, or *Category 3*. You can also choose to copy a specific class or classes as well as filter for classes with a specific *Status*.

## New Class Settings

In the **New Class Settings** section, you will define the settings for the new classes that are being created.

Select the *New Session* from the drop-down (required). The *New Class Start Date*, *New Class End Date*, and *New Class Registration Start Date* fields are automatically populated with the dates used to create the session (*Tools > Edit Settings > Drop-down Lists > Session*), however, they can be edited if you choose. The start and end dates are required fields.

Indicate whether you want to copy the instructors, skills, costumes, resources, and virtual class/video information from the original classes into the new classes.

New Class Settings

New Class Start Date\*

New Class End Date\*

New Class Registration Start Date

Copy Instructors

Copy Skills

Copy Costumes

Copy Resources

Copy Virtual Class/Video

Set these to **Yes** if you want to copy class **Resources** and **Virtual Class/Video** information.

## Option: Copy Enrollment?

In the **Option: Copy Enrollment?** section, indicate whether or not you want to *Copy Student Enrollment*. If opting to copy enrollment, select an *Enroll Type* for the new class enrollment. Note: Makeups that are scheduled in the old classes are not copied forward.

Indicate whether you want to *Copy Future Enrollments* or *Copy Wait Lists* from the old classes into the new classes. Select an *Enroll Date* for new class enrollment (will default to current date). When a future date is used, you will see a warning that you are not able to post tuition fees until that date because, until then, the students are not enrolled in the new classes.

*Future Drops are not copied forward with enrollment. Jackrabbit assumes the Future Drop is happening prior to the session change.*

#### Option: Copy Enrollment?

If students (or students within a program) typically stay together within a class from session to session, you can copy the student enrollment and drop the differences.  
Note: Makeups are NOT copied into the new class.

Copy Student Enrollment?  If Yes, set Enroll Type to

Copy Future Enrollment?

Copy Wait Lists (if any)?

Enroll Date for new class enrollment

You won't be able to bill tuition for this class using 'Post Tuition Fees' or 'Post Tuition Fees by Total Hours' until this date

## Option: Drop Students From Old Classes?

In the **Option: Drop Students From Old Classes?** section set *Drop Students from old class?* to Yes to drop the students from the current class immediately. This option only drops the students from the classes, it does not archive the classes which is the last step when [transitioning between sessions](#).

*You should only opt to drop students after all class fees have been posted.*

Consider using [Archive Classes](#) instead (which will also drop the current enrollment) at a later time after you have completed your fee posting.

#### Option: Drop Students From Old Classes?

IMPORTANT: Do not set the Drop Students field below to Yes unless you are ready to drop all currently enrolled students within the selected Session.

Drop Students from old class?
