

Does Jackrabbit support virtual classes or video conferencing?

Last Modified on 11/03/2020 12:35 am EST

We are here to help you during this difficult time! Although we do not host virtual classes or video conferencing, you can add video links to classes in Jackrabbit to keep your students engaged, even when they can't attend classes.

There are multiple ways you can share video links in Jackrabbit:

- Parent Portal - add video links or video conference links to the [Parent Portal News & Announcements](#). In addition, video links can be added to individual classes and are accessible in the *Class Card* under *My Schedule* in the Parent Portal. See [Add Access to Online Training in the Parent Portal](#) for more details.
 - Email - email [classes](#) or [families](#) and add a video link or a video conference access link.
 - Skills/Levels - create a video assignment using [skills](#) and add a shareable link in the Video Link field.
